About Me

A 6th-semester Computer Science student at Universitas Mercu Buana with a strong interest in Web Development. Experienced in developing web applications using JavaScript and SQL Database, and completed the Bangkit 2024 Independent Study Program focusing on Mobile Development. Possess internship experience in Data Entry, which enhanced accuracy in data management. Quick to adapt to new technologies and enthusiastic about creating effective web solutions.

Experience

Independent Study - Mobile Development (Bangkit Academy)

September 2024 – January 2025

- Improved understanding of Android application development using Kotlin.
- Developed soft skills such as Growth Mindset, Time and Energy Management, Critical Thinking, Problem Solving, and Project Management.
- Enhanced practical experience through various Android app projects.

Data Entry Internship

September – October 2019

(Oil and Gas Tax Service Office/Kantor Pelayanan Pajak Minyak dan Gas Bumi)

- Strengthened attention to detail and speed in tax data entry and management.
- Gained deeper understanding of tax administration, systematic document archiving, and accurate data processing.
- Developed proficiency in using databases for efficient data storage and management.

Projects

To-Do List Web App

March 2025

- Enhanced understanding of REST API development using Go programming language (Gorilla Mux) and integrated with MySQL.
- Deepened asynchronous communication skills between frontend and backend using jQuery AJAX.
- Improved dynamic data management through CRUD features and input validation.

Portofolio Web App

March 2025

- Showcased personal information and projects to demonstrate competencies in web development.
- Strengthened personal branding through responsive design using Bootstrap and jQuery.
- Facilitated potential clients or recruiters in assessing abilities and experiences through an online portfolio.

System Analysis for Online Tent Rental

May 2024

- Analyzed tent rental businesses in the surrounding area.
- Created UML designs including Use Case, Activity, Sequence, and Class Diagrams for system requirements.
- Designed UI/UX concepts for a tent rental website.

Letter Management System Web App

November 2019

- Developed a letter management system to optimize the processing of incoming and outgoing letters through digitalization.
- Utilized MySQL to secure and organize letter data effectively.
- Built using PHP for backend development.
